

**Purpose**

The purpose of this index is to reference the cost and rules of the various Disadvantage Samples used in the HERO System 5<sup>th</sup> Edition. It is not the intent of the author to list every page reference to the Disadvantage Samples, or how to build Disadvantages, in HERO System 5<sup>th</sup> Edition. If you wish to know the specifics on how to build a Disadvantage, you will find it on the Pages listed. The errata listed on the Hero Games website has also been included in this document up to the date of June 27, 2002. There will be two other documents that accompany this one. They will index the Sample Powers and Modifiers in HERO System 5<sup>th</sup> Edition.

Updates to this document should be made no later than the date scheduled for the next supplement in the HERO System 5<sup>th</sup> Edition product line. All updates will include the latest version of the errata as well as the book being added to the listing. All Disadvantages have been listed as they were written in HERO System 5<sup>th</sup> Edition. The cost, footnotes, and page references listed are taken, for the most part, verbatim from the text indexed.
